■ DLQC-DPBS013 Automatic Transmission Dismounting Training Platform

• Basic Configuration

- Identification bench, manual transmission assembly and disassembly tools
- Feature
- Applicable for professional automotive transmission disassembly practical operation skills assessment of various types of institutions;
- Know the assembly structure of manual transmission;
- Training on disassemble and assemble of manual transmission assembly, trainees can practice assembly disassembly and repair operation on the workbench;
- Meet the requirement of dismounting, commissioning, inspection on whole process of manual transmission assembly;
- The platform is available for two students at same time

• Training Content

- Identification on disassembly and assembly of transmission
- Identification on understanding the structure of the transmission assembly
- Identification on the actual installation location of each component part
- low speed rear derailleur assembly is completed, the transmission line project identification each gear
- items recognized gearbox fault diagnosis and identification after assembly
- Identification transmission practical and theoretical examinations
