

The Cold Rice Noodle Machine

Mesin Pembuat Kwetiau

1. The Introduction of the Cold Rice Noodle Machine

Cold Rice noodle Machine are made of high-grade imported stainless steel, this machine is fully airtight and can make the rice noodles automatically. It looks beautiful and durable, perfect function, NC instrumentation control, easy to operate. It adopt multifunctional direct thermal heating, and computer control the temperature. It also can save energy, high production rate, the product can be automatically formed, and the noodle thickness can be adjustable.

2. Characteristics of the Cold Rice Noodle Machine

- 1) Simple: can lighting power, boiler, fuel, energy saving and low consumption.
- 2) Saves time and effort: to produce 20-600 pounds, two-person operation, automatic folding, separation, effort, time-saving.
- 3) Energy efficient: The machine uses multi-layer energy pipeline structure, and heated liner surrounded by all able to absorb heat. Than market Liangpi machine energy saving over 50% per cent.
- 4) The multi-function: a machine to use to produce rice noodles, rice rolls, rice rolls and pull, bran, Liangpi.
- 5) Attractive and durable: The import of stainless steel and steel manufacturing. The structure is beautiful, and the life of more than 10 years.

3. Heating Method:

Electric and steam dual-use.
