

Automotive Integrating Theory & Practice Training System

Note :

Due to keeping innovation, the specification and Machine pictures or color are subject to alteration without notice!

■ DLQC-C004 Prius Hybrid Systems Simulation Demonstrating Board

■ Introduction

- Can be observed hybrid system components, parts and working mechanism (planetary gear mechanism, MG1 motor, MG2 motor, engine) detailed structure in anatomical running platform. Hybrid battery pack is mounted on an anatomical model.
- Engine, variable speed drives, inverters and batteries are dissected, spraying different colors.
- Using 220V motor drive, the engine and motor operation through key.
- Dimensions: 1050 * 700 * 1500mm
