I.OVERVIEW

This experiment equipment is mainly used wuling rear axle assembly processing ,student can perceptual intuition understand the incidence relation and installation position of auto rear axle through this equipment ,it can deepen the understanding of auto rear axle working principle ,and the ability of solve practical problem ,cultivate the correct and efficient thought habit ,it's suitable for the auto rear axle construction and the maintain training examine requirement of higher vocational colleges and training institutions .

- 1.This experiment workbench is composed of SAIC-GM-Wuling rear axle system ,transmission axle brake ,rear suspension ,mobile bench ,etc ,it is suitable for the training of auto professional operation skill at all levels.
- 2.The demonstrate of actual auto component and the connection principle between every component for student to understanding of the entity .
- 3.It can complete the construction and principle understanding training of all the component in the rear axle system .
- 4.It can complete the dismounting training of rear axle system .
- 5.It can complete the system detection and maintain training Supply English user manual.
