

ZM3101E Air Cooler Trainer

I. Product Introduction

Due to the different configurations and product upgrade and other reasons, the actual product may be different from the picture, it is for reference only. Air conditioning training evaluation device is for relevant professional training teaching of vocational colleges and vocational schools, and cultivates applied talents who master air conditioning and refrigeration technology theoretical knowledge and professional practice skills.

II. Product Introduction

1. The device can fully show the refrigeration system structure and the whole process of the refrigeration system maintenance, to meet practical teaching, practice engineering training and vocational skills competition need.
2. The device takes project teaching and task leading as practical teaching, and take work process as orientation, to improve students' interest for training courses.
3. It is comprehensive, can make up a variety of refrigeration systems, with a variety of control methods, it is with strong practicality, versatility and economy,
4. The device uses a modular design, electrical control and cooling system are separated, and corresponding feature points can be measured, which not only ensures students' basic skills training and consolidation, but also ensures fast circuit connection, secure and reliable.
