DLQC-CAN Automotive Body Bus System Training Set

Note :

Due to keeping innovation, the specification and Machine pictures or color are subject to alteration without notice!

■ Overview

New Passat B5 Can-bus system components, sensor, actuator, experiment panel, workbench. It is fit for teaching of can-bus system structure and maintenance. It can fulfill the teaching requirement of electrical control petrol motor structure, work principle, fault setting and diagnosis.

■ Feature

- Show the compose and working process of comfort system and dynamical system
- Diagnosis connection function, diagnosis CAN digital transmission net and terminal control unit by automotive fault computer diagnostic unit
- Detection: color circuit panel and the detection diagnostic SITE combination can repeat various parameter of the nondestructive detection circuit system
- Fuel injection pulse width table (real-time signal)
- LED light show system Synchronous hint to CAN system
- Fault setting: can set fault by manual or computer. easy to test
